

## Volvo Amazon Production Data

The Volvo Amazon was manufactured in 14 model years (1957 – 1970) and is during the first years only available as four door sedan (P 120). In October 1961 the by many perceived as sportier two door sedan (P 130) is introduced and at the Stockholm Motor Show in February 1962 the Estate (P 220) is introduced. The different bodies have their own series of chassis numbers. The last Volvo Amazon, a dark blue P 130, rolled off the assembly line at the Torslanda plant outside Gothenburg on Friday, July 3rd 1970. It has chassis number 359726, was saved and can be seen at the Volvo Museum in Arendal. The remaining 192 units are shipped as *CKDs* (*completely knocked down units*) to the assembly plant in Durban, South Africa during the fall of 1970.

\* Concerns the prototypes X1 and X2 that had chassis numbers 1 and 2 respectively. Both were registered for traffic in Sweden and therefore included here.

\*\* Calculated point in time based on available chassis number data and on the assumption of even production pace of the cars being produced in the period.

Later Volvo stated what chassis numbers belongs to what model year during this period.

Model year	Chassis number		Type designation	Comment
1957	1	248	P 1200	H6
1957	249	4435	P 1200 V/H	H6
